

I help people live their life,
but I can also take it away.

ELECTRIFIED LINES ARE
ALWAYS ON.

**SO ALWAYS
STAY OFF.**

**I bring families together.
Or I can keep them apart.**

**I reunite friends.
Or make sure you never see them again.**

**Life bustles around me.
I help millions every day.**

**But don't get too close to me.
I've got a sting in my tail.**

Network Rail is electrifying the Midland Main Line, bringing quicker, quieter and less crowded trains. The upgrade will be the biggest transformation of the line since 1870. However, it also means there'll be a deadly 25,000 volts running along the line at all times. And from Saturday 11th April 2020 this power will be switched on in your area.

So remember the danger you can't see.

ELECTRIFIED LINES ARE

ALWAYS ON.

**SO ALWAYS
STAY OFF.**
